

Lotion Crème Moisturizer

Lotion crème moisturizer imparts essential moisture and oils to soften a dry hair type. This non-greasy formula is great on natural, pressed or chemically processed hair. Can be applied to wet hair or for daily maintenance.

Benefits include:

- More oil for dry hair types
- Non-greasy formula leaves a luxurious feel
- Soft, smooth hair
- Fragrance free

Instructions - Shake Well

For daily maintenance pour Lotion crème moisturizer in your palm and rub your palms together. Starting with the ends, smooth on the hair. Since the ends need more apply most of the product there, smoothing from the top of the head down to the ends what is left on your hands after the ends. Apply before or after styling and as often as needed. The amount you apply depends on your needs. Use modest amounts if your hair is slightly dry and generous amounts for excessively dry hair.

After a protein treatment apply larger amounts on the hair as described for daily maintenance immediately after the treatment and as often as needed to soften the hair. Can also be used to soften the hair after a UBH deep condition.

For best results keep it off the scalp.
