**Subject:** Naturals and UBH Cream Moisturizer

Your Products are wonderful for those of us who do not use relaxers. With regular use, the Deep Conditioner strengthens the delicate natural (kinky) hair. When I rinse out my conditioner, I towel dry and I immediately put in the Cream Moisturizer and spray on the Dew Moisturizer lightly. I comb the hair gently and braid several plaits through out and wrap my hair with a satin scarf. The next morning I unbraided my hair I am shocked at how healthy my hair looks. My hair hasn't looked this healthy since I was 18 years old. Now that there is less breakage, I can see the length as my hair grows. My hair growth is average but I never saw the length because of the dry broken ends snapping when I comb it. Another added bonus is that by the second day following the shampoo, my hair looks like I put heat on it. No Kinks. WONDERFUL!

I have found that the Cream Moisturizer is best for daily moisturizing on my hair and the Dew is great when used with the Cream Moisturizer following Deep Conditioning.

Thank you,  
Marian A.
