Subject: The whole truth!

Dec 27, 2005

Hello,

Hi, first of all I want to say that Cathy you are a genius for doing this research on black hair care, and I wish I would have known about it earlier, because everything you have said in your book was right on point. You know how black people should take care of their hair to maintain their length, texture and healthiness. My name is Erica and I have been using your product for 3 weeks now and I have seen a tremendous change in my hair and texture. I have always wanted long hair, but it never grew out. And since I have found your product it's improved my life. I have purchased the conditioner and the moisturizer and I noticed the difference when I first used it. This product is light on the hair and the appearance is outstanding. But there's really no words to describe this product, the only thing I can say is that it really does work and as long as you change your old habits about the way you take care of your hair you will be very shocked at the results.

I can say that I will continue to use your product for ever! It's wonderful!
And also, for the people who don't have your product, please go get it and you will be very satisfied.

thank you very much,
Erica Rhea
Minneapolis, MN
