Hi Cathy,

My name is Paulette. I live in "sunny" London. I'm just sending you this email to say "about time too" and what I mean is at last someone who is explaining to Black women and men about the wonderful hair we have and how we can reap the rewards of our hair.

I read your book last November, bought the products but I know this was not just about your products for even if I had used the products and had still been doing daily damage like constant heat using a hair brush etc then your products would have been futile and a waste of money.

In just under four months my relaxed hair has grown about 1 1/2 inches(maybe more) it is past my shoulders My daughters hair which has always been long is now down her back,and you know whats funny I have always been the one to look after my daughters hair it is natural thick and strong and you know I have never cut her hair and it has always grown so why oh why do we not just follow simple common sense all of the time! becasue your book is not rocket science at all it is simple common sense.

I have a wonderful hair dresser who relaxes my hair she does not do any treatments at all, I treat my hair in between relaxers and she doesnt ever mention about trimming my ends for she knows when I want my ends trimmed I will ask her, and everytime she sees mc for a retouch about every 8 weeks she comments on my lovely growing hair. I have set myself the year long goal of 6 inches ,I do have photos and when my year is up , or I reach the 6 inch growth whichever comes first I will send you all of my pictures.

Please use this email on your website with my pleasure.
