Subject: Distributorship in South Africa

Hello my name is Juanita and I was introduced to your product by my sister. After using your product line for over 6 months, I have noticed a major difference in the health of my hair. Your product line has helped me grow my hair longer and heather than any other product on the market. I have to say I love your unique range of products and continue to use them as of today.

I am a licensed cosmetologist with over 22 years of experience in the field and I have never seen a product like yours that really works and gives results. I have also used your products on some of my clients and noticed the difference in the health of their hair.

I am in the process of moving to South Africa and wanted to know if you have a distributor down there? If you do not, I would be very interested in discussing an opportunity to distribute your product in South Africa . I believe there is tremendous potential for your product range and would like to introduce your product to more women of color.

Sincerely,

Juanita Marable
